RE: TSE-2015-05-0162.R1, "A Game-Theoretic Foundation for the Maximum Software Resilience against Dense Errors"

Manuscript Type: Regular

22-Nov-2015

Dear Prof. Wang,

Congratulations! I am pleased to inform you that your paper has been accepted with no further changes as a Regular Paper in an upcoming issue of the Transactions on Software Engineering.

Please submit all final files through the Awaiting Final Files queue in your Author Center on ScholarOne Manuscripts. Please upload all files in a single session, and make sure your final package is correct and complete upon submission. Once you have completed the submission of your final files you will not be able to make any changes until you have received the page proofs from IEEE. A detailed list of the required files is below.

Please be advised that this journal follows a preprint model. This means that the current accepted version we have on file will be downloaded from ScholarOne Manuscripts and will post to IEEE Xplore 5-7 days from when we receive your final materials. Preprint versions are fully citable, and no changes can be made to the accepted version at this time. Any typographical errors can be addressed with the production editor during the proof stage, and your copy-edited version will replace the preprint version online when you have finalized the proofs. In addition, the source files requested below must match the accepted PDF we have on file. Any subsequent PDF files will not be used for production.

If for any reason you would prefer not to have your paper posted as a preprint, please email c.kurzawa@ieee.org prior to submitting your final materials through ScholarOne Manuscripts; otherwise, not responding indicates your acceptance of our policy.

The final items required for publication are:

1) A Latex or Microsoft Word application file. This should include keywords/index terms, and bios and photos if you are including them. The contents of this file should match the accepted PDF. Failure to submit a source file may result in publishing delays.

2) If your figures are not embedded in the source file of your manuscript, you will also need to upload separate figure files. The acceptable formats are Word, eps, ps, tiff, ppt, pdf and excel. We do NOT accept png or jpeg files for figures.

Please also identify a teaser image from your manuscript or a small custom image that relates to your paper that may be used in the abstract book as part of the OnlinePlus program and upload it as a separate file labeled: Teaser Image. Note that failure to include this information will cause delay in posting/processing your manuscript for publication.

NOTE: If you intend to use an image that you didn't create (that is, it originally appeared elsewhere or someone else created it), you will need to provide permission that you're authorized to use that image to the production editor assigned to work with you on your article.

3) Biosketches and photos of all authors. Biosketches should be uploaded at the same time as the other final files, if you plan to include them. These can be included at the end of your Microsoft Word or Latex source file, or submitted as a separate upload. For author photos jpeg files are accepted. NOTE: If one of your authors does not want a photo published, please upload a document explaining this to avoid publication delays with your article.

Please make sure that all files have unique file names in order for them to export successfully to IEEE

Additional information (including our strict size limitation for all accepted articles) can be found by visiting:
<http://www.computer.org/portal/web/peerreviewjournals/author#final>.

Thank you for your contribution to Transactions on Software Engineering. We look forward to seeing your final files soon.

Best wishes,
Christine Kurzawa, on behalf of:
Matthew Dwyer, EIC

Editor's Comments:

Editor

Comments to the Author:

(There are no comments. Please check to see if comments were included as a file attachment with this e-mail or as an attachment in your Author Center.)

Reviewers' Comments:

Please note that some reviewers may have included additional comments in a separate file. If a review contains the note "see the attached file" under Section III A – Public Comments, you will need to log on to ScholarOne Manuscripts to view the file. After logging in, select the Author Center, click on the "Manuscripts with Decisions" queue and then clicking on the "view decision letter" link for this manuscript. You must scroll down to the very bottom of the letter to see the file(s), if any. This will open the file that the reviewer(s) or the Associate Editor included for you along with their review.
